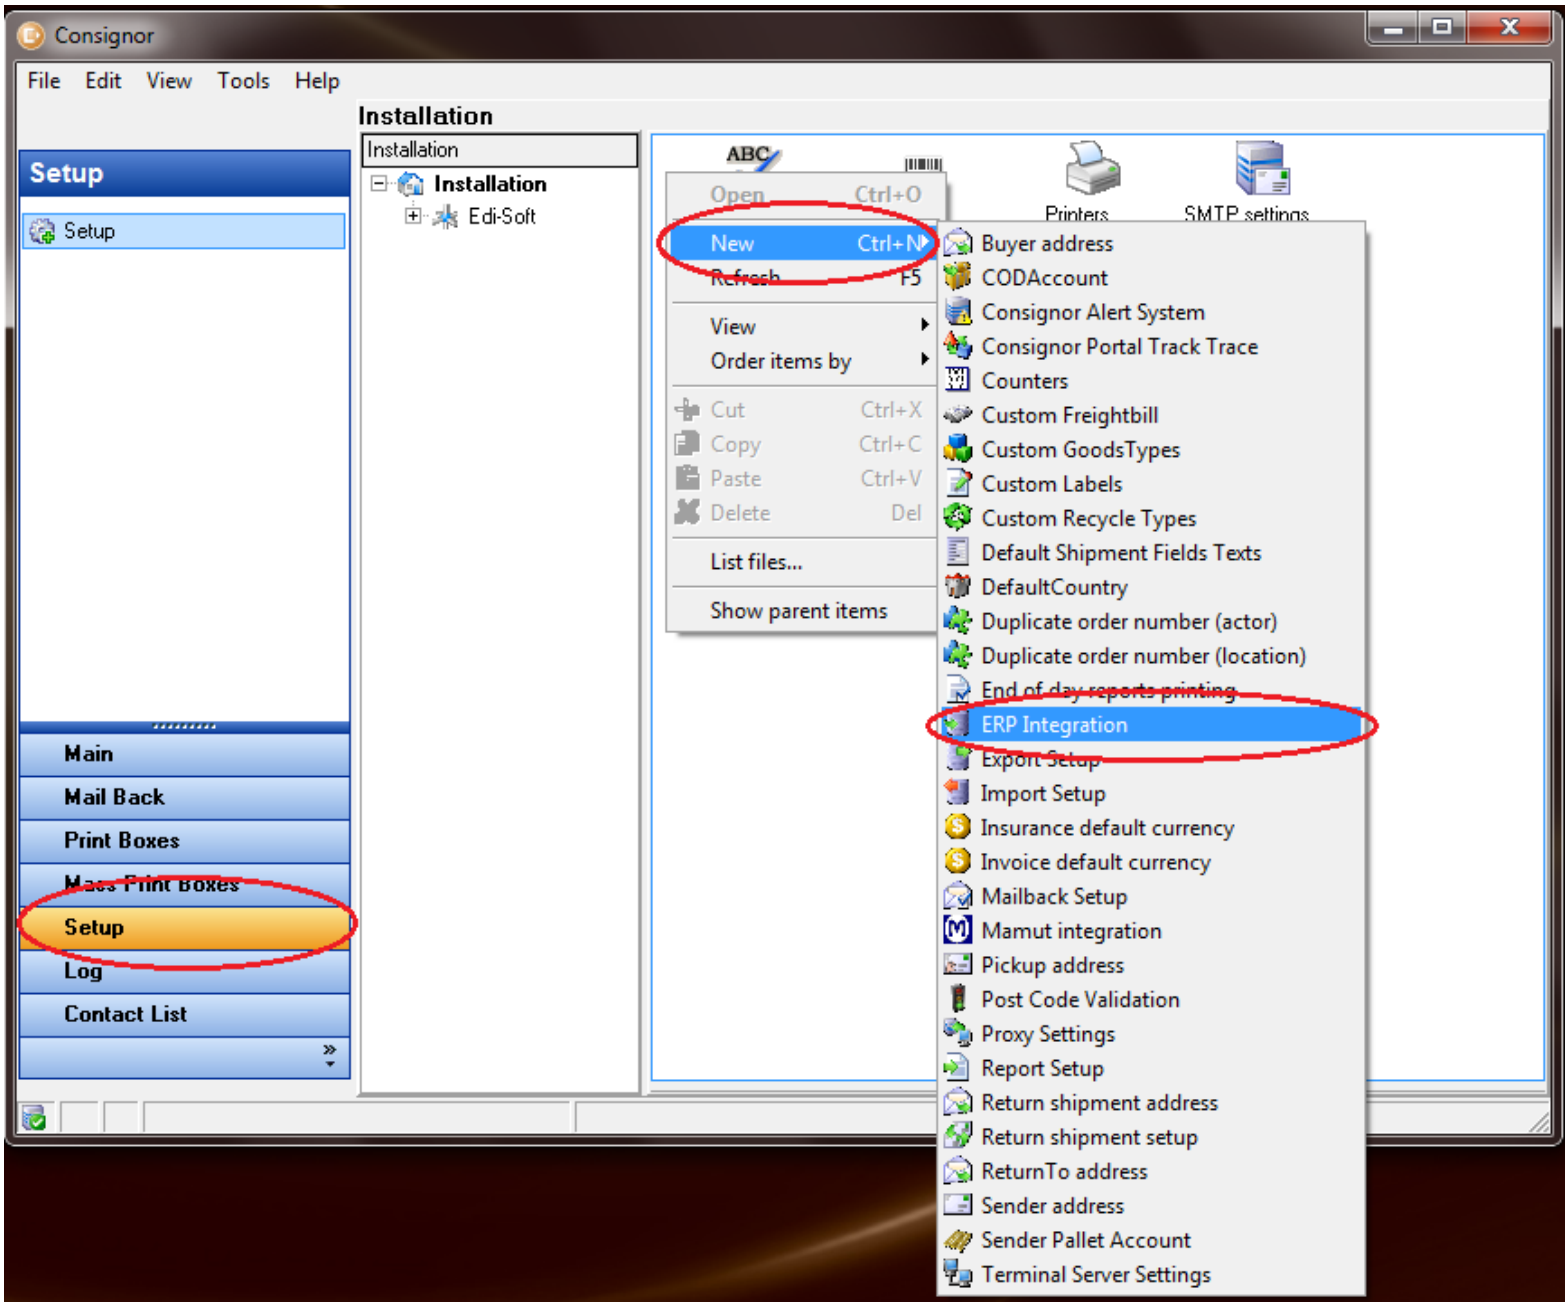
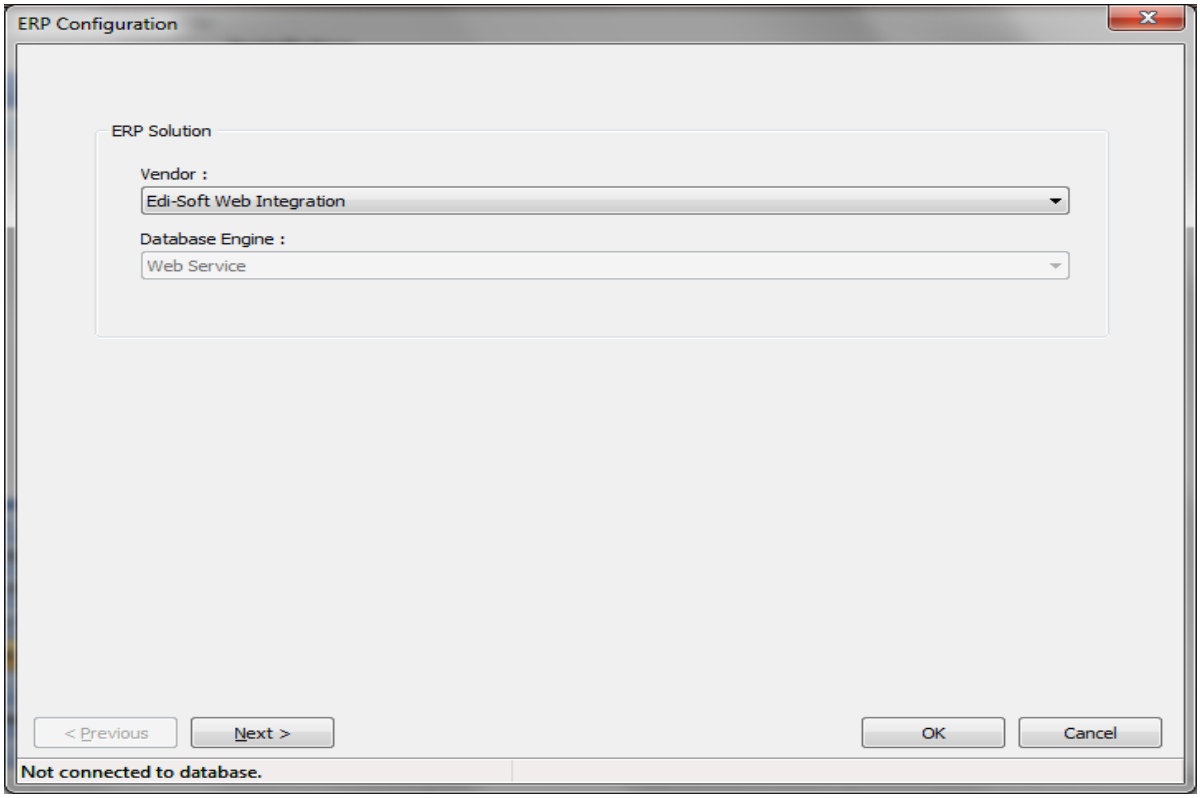
# Integration setup in Consignor

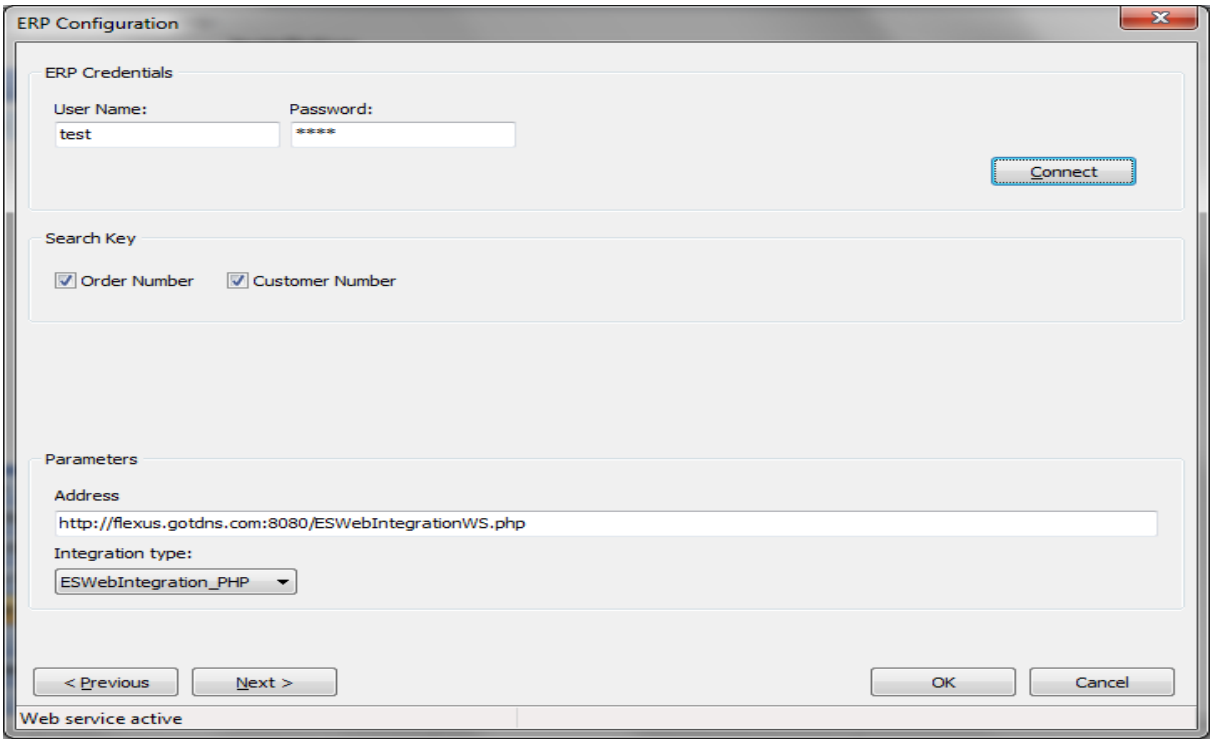
- Choose setup from the left menu
- Right click in the right window, chose New -> ERP Integration



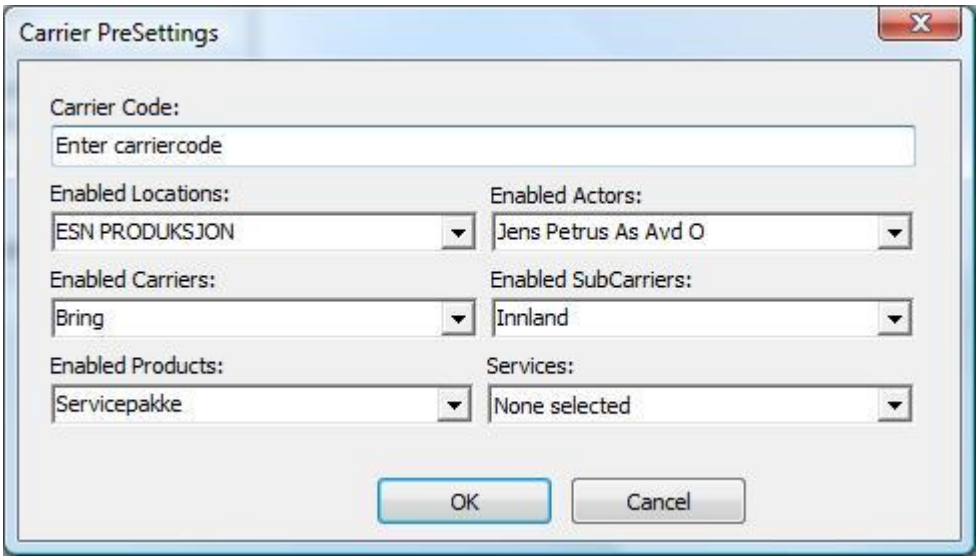
- Select Edi-Soft Web Integration from the Vendor drop down menu
- Click next



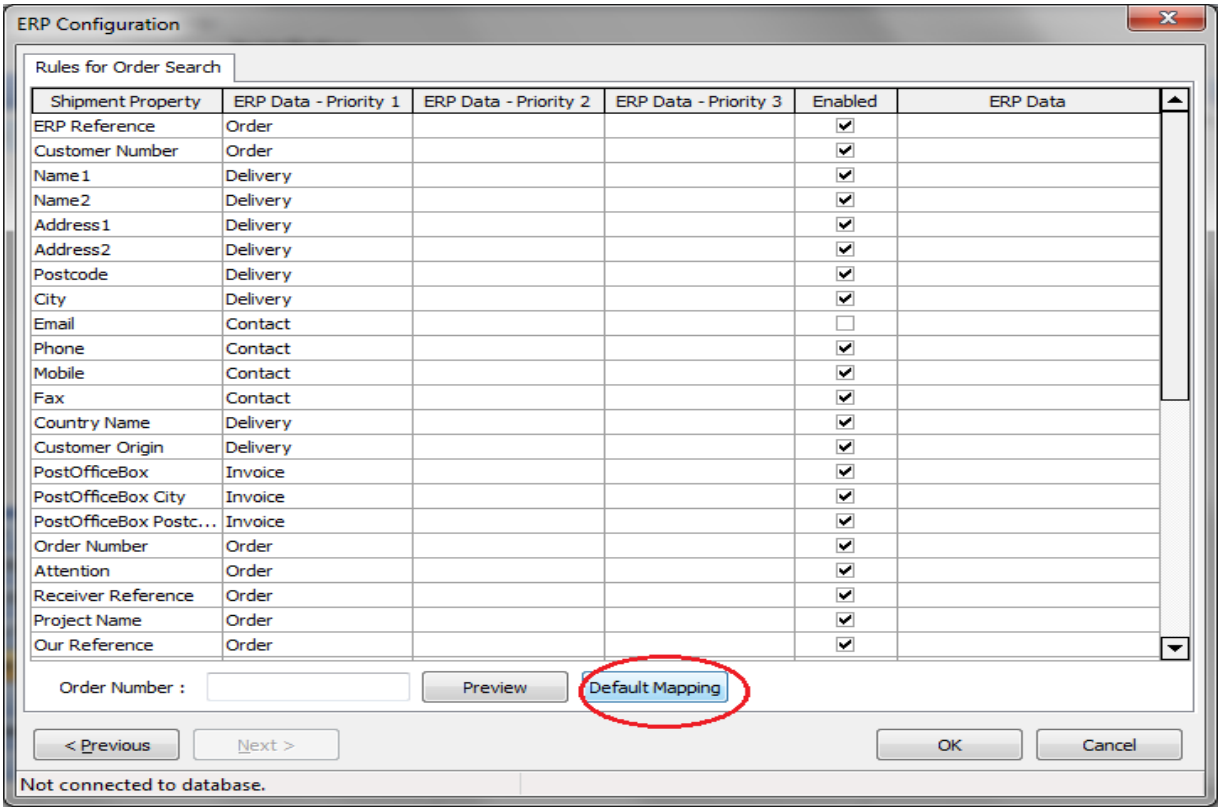
- Enter your login credentials
- Select the checkboxes Order Number and Customer Number(if you use both)
- Enter the URL to your WS in the Address field
- Choose  Integration type ESWebIntegration_PHP
- Press the Connect button
- Click next



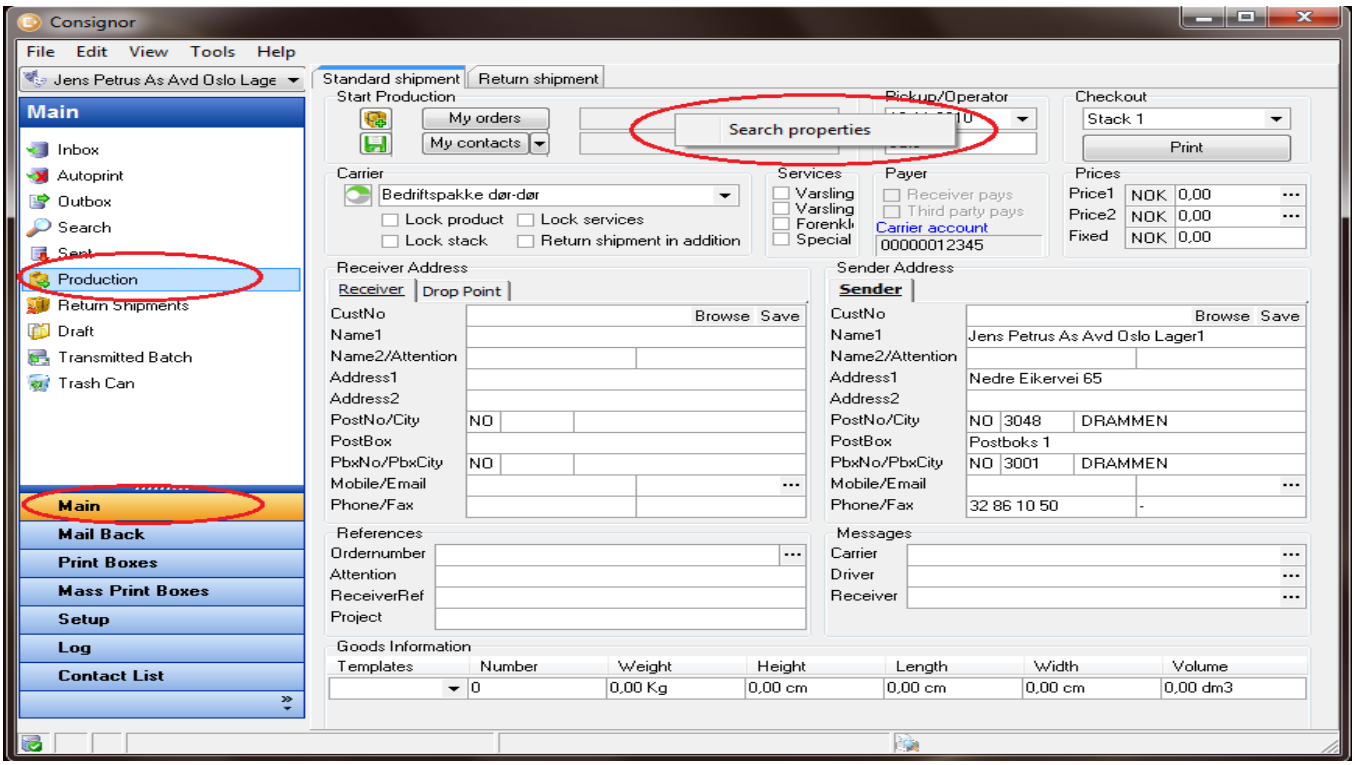
It is possible to configure Consignor to choose carrier and shipping method based on the order if your system provides carrier on order. Enter the code for the carrier / product and choose what Consignor should choose when this is sent on the order from the Web Service.



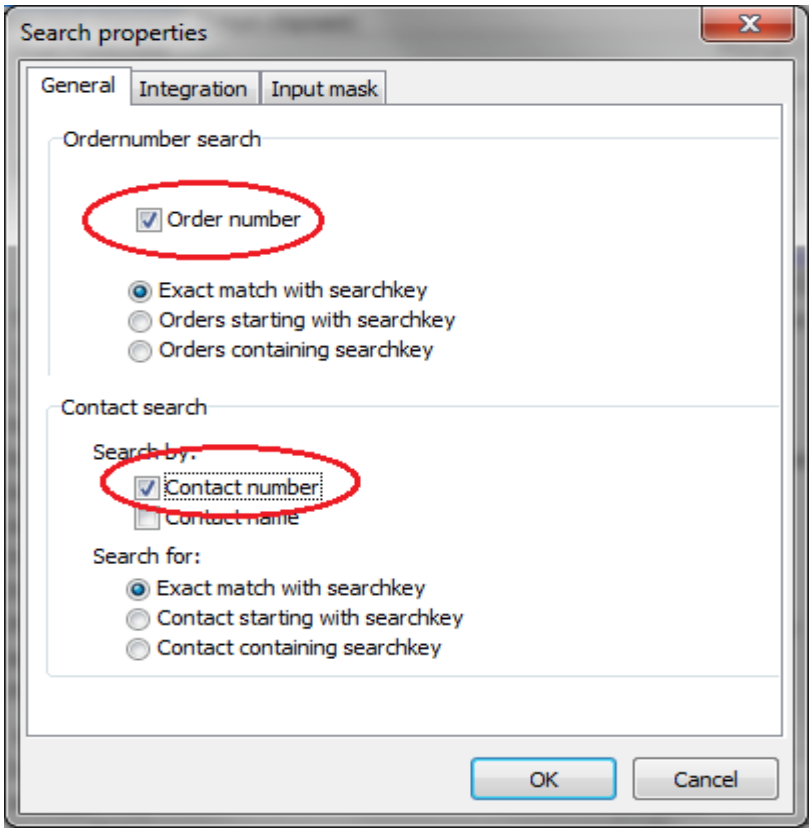
- Press the button Default Mapping
- Click OK



- Choose Main from the left menu and production
- Right click in the gray field to the right from the My Orders button
- Select Search properties

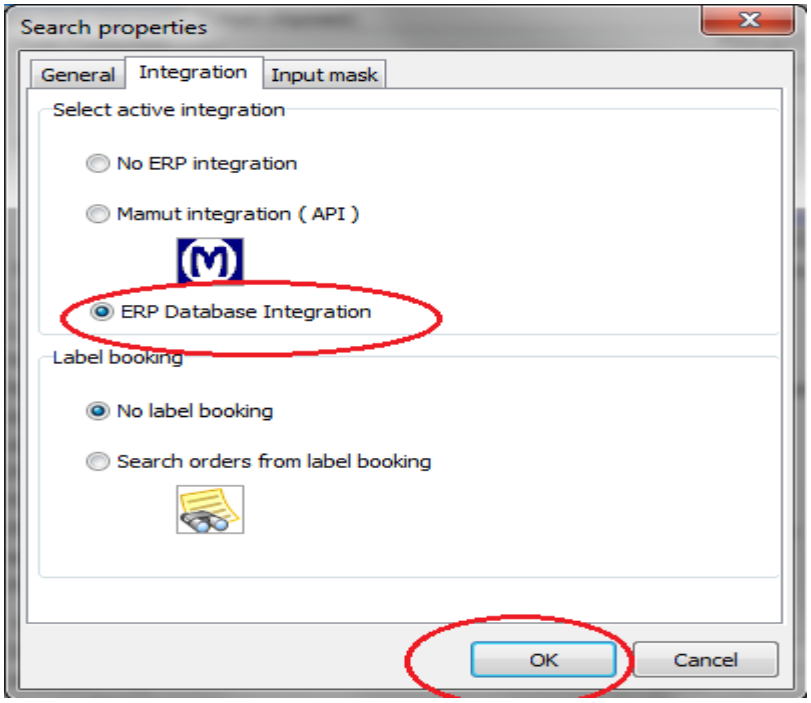


- Select Order number and Contact number
- Click the Integration tab



- Select Database Integration

- Click OK



- For order search, enter a order number in the first field and hit enter
- For customer search, enter a customer number in the second field and hit enter
- The result of the search are displayed in Consignor
- Return data from Consignor will be send to your WS, when you press the Print button(only on Order search)
